

PREDICTIONS MADE ON 15th MARCH, 2020 REGARDING CORONA VIRUS DISEASE

ॐ श्री गणेशाय नमः

For making predictions for a Nation, the horoscope of the nation needs to be seen. Further, events involving masses/ countries fall under the branch of Astrology known as " Mundane Astrology". I have studied the horoscope of India and my observations/ predictions regarding "Corona Virus Disease" are as under:

1. India's lagna is Taurus (Vrishabh). India is presently running the mahadasha of lagna lord "Venus". Because of this very fact the health of the nation as a whole will remain protected to a great extent since lagna/ lagna lord represents the physical body.

2. However, the antardasha is of Jupiter which is the lord of 8th and 11 th houses and placed in 6th house (the house of diseases). Jupiter although a natural benefic turns malefic in case of Taurus lagna due to it's lordship of two bad houses 8th and 11th. However, due to placement of Jupiter in 6th house it's malifiscence gets reduced as it gets weakened in 6th house. Having said that it's connection with house of sickness and malifiscence for Taurus lagna remains.

3. Now, let us examine the "Pratyantardasha". From 6th April, pratyantardasha of Mars will start which will be operative till 30th May, 2020.

Mars is inimical to lagna lord Venus and is the lord of 7th (Marak) and 12th house (house of hospitalisation) and is placed in 2nd house (Marak sthan).

4. Further, let us examine the transit of planets whose Mahadasha, antardasha and prtyantardasha is running.

Venus is currently transiting inimical Mesha (Aries) rashi in 12th house, the house of hospitalisations, isolations and anything connected with foreign. This virus coming from foreign land will lead to isolations and hospitalisations. Venus will change sign on 28th March, 2020 and will remain in lagna i.e. Taurus till 31st July , 2020. Being lagna lord and transiting in lagna, it's own rashi, it will remain strong during this period and will protect the health of the nation.

Jupiter, the antardasha lord will be transiting Capricorn i.e. 8th house from rashi and will bring suddenness.

Mars, the Pratyantardasha lord will also be transiting Capricorn, the 8th house from rashi till 4th May, 2020 and after that will move to Aquarius. 8th house is the house of suddenness, longevity and research.

5. Let us now examine the position of "Karakas" of this disease.

The karaka for viruses "राहु" entered "आर्द्रा" नक्षत्र on 27th September, 2019 and will remain in this नक्षत्र till 22nd April, 2020. आर्द्रा नक्षत्र being moist by nature helps in spread of viruses.

Further, Rahu entered Gemini sign on 7th March, 2019 and will remain in Gemini till 23rd September, 2020. Gemini is the exaltation sign of Rahu. Gemini is also 2nd house in India's horoscope and is a marak sthan.

6. Synthesizing the various factors based on the above analysis, the period from 6th April to 3rd May, 2020 is the period to be watched for. Hospitalisations may increase due to antardasha and pratyantardasha and bad transit of inimical planets (Jupiter and Mars) but fatalities may be low due to Mahadasha and favourable transit of lagna lord Venus.

Further, during this period, India's partnerships with foreign countries to fight this disease will increase and there are fair chances of Indian scientist developing a vaccine for it.

7. From the world perspective the game of the Corona Virus gradually decreasing should be over by 23rd September, 2020 when Rahu leaves it's exaltation sign.
